

PRE THINK YOUR CHOICE OF ROUNDBAR

GREAT TOOLS ARE PREHARDENED

Prehardened Toolox roundbar steel can cut your production time and give a better product at the same time. You can go straight from machining to production. No need to stop for time-consuming and costly heat treatment on the way. Toolox has excellent machinability thanks to low carbon content. The steel is both hard and tough for an extended service life, and ultra-clean for superior fatigue resistance. If you haven't tried Toolox yet, now it's time to prethink. toolox.com
